At ACO, we identify children who are constrained by their financial status to fulfill their basic right to education and find passionate individuals who are willing to sponsor those children education. Thus, ACO act as a platform through which love, care and responsibility are shared between the needy child and the benevolent sponsor.

Adopting an underprivileged child is considered as a divine task. You are not only adopting a child, you are setting an example of humanity. With you, a poor child is not poor any more, an underprivileged is not underprivileged any more – It's going to happen only with your contribution.

Do not just see things to happen. Contribute your part to make things happen! If you think you can, you are right!

Be a part of ACO!
